

Abstract

The present invention relates to new 4-hydroxy-2H-thieno[2,3-e]-1,2-thiazine-3-
5 carboxamide-1,1-dioxides of general formula

wherein X, is fluorine, chlorine, bromide or CF₃, R¹ is hydrogen or C₁ -C₂ and R² is
10 C₁ -C₂, which compounds have, inter alia, anti-inflammatory activity.
